# ODOO – WOOCOMMERCE CONNECTOR

This application is used to connect your odoo and woocommerce and export or import data bidirectionally. Using this module you can easily manage your multiple woocommerce stores by connecting with your odoo database.

This application provides the features for exporting and importing Customers, Sales Orders, Products, Product Categories, Product attributes and values, Taxes.
User can create and configure multiple woocommerce instances in odoo and start importing and exporting data, this module have a beautiful userfriendly dashboard from where user can see the synced data count, total sales along with a bar graph.

How to use each of this functionality are shown below.

After installing this module goto the menu *WooCommerce*
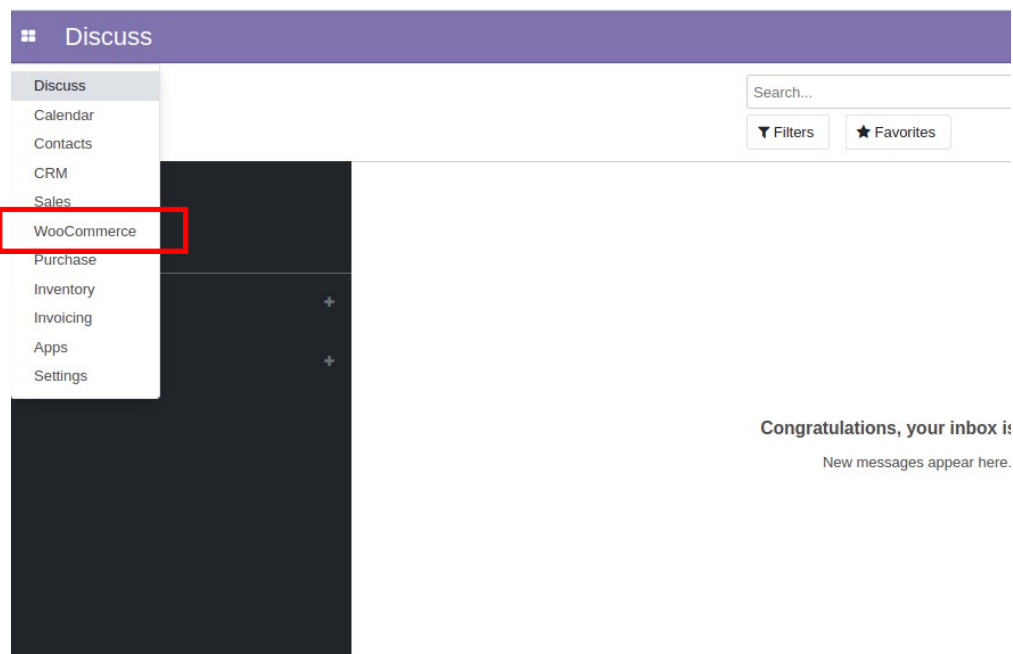

First we need to create and configure the instance for that goto
Configuration > *Woo Instance*

Save Discard

Authenticate

Name Instance One   Authorization URL   http://www.example.com
Company My Company

Consumer Key
Consumer Secret

From here create new instance by providing your WooCommerce credentials, after saving everything you can authenticate the details you have entered by clicking on the authenticate button, if the connection is success you will get a message like below,

Dashboard   Export/Import   Configuration   My Com

s / Instance C

User Error   ✕

Congratulations, WooCommerce and Odoo connection has been successfully established

Ok

Instance One   Authorization URL   http://podcast.pragtech.co.in
My Company
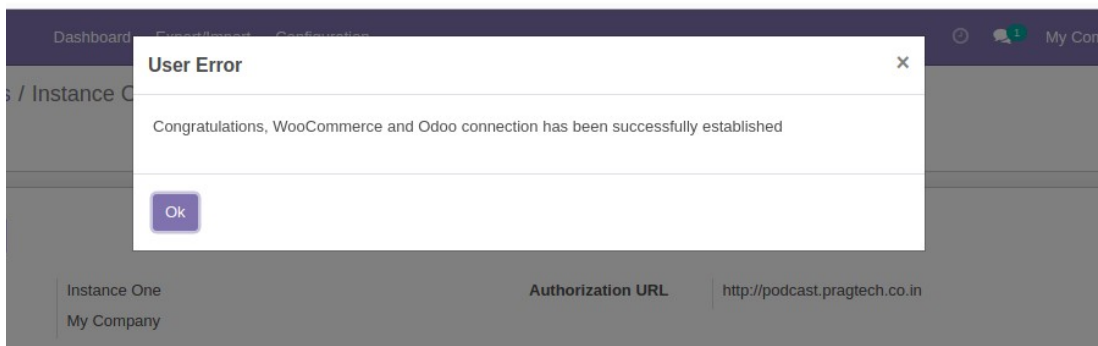

Now we can start importing and exporting of data, a new dashboard will be created automatically for each newly created instances.
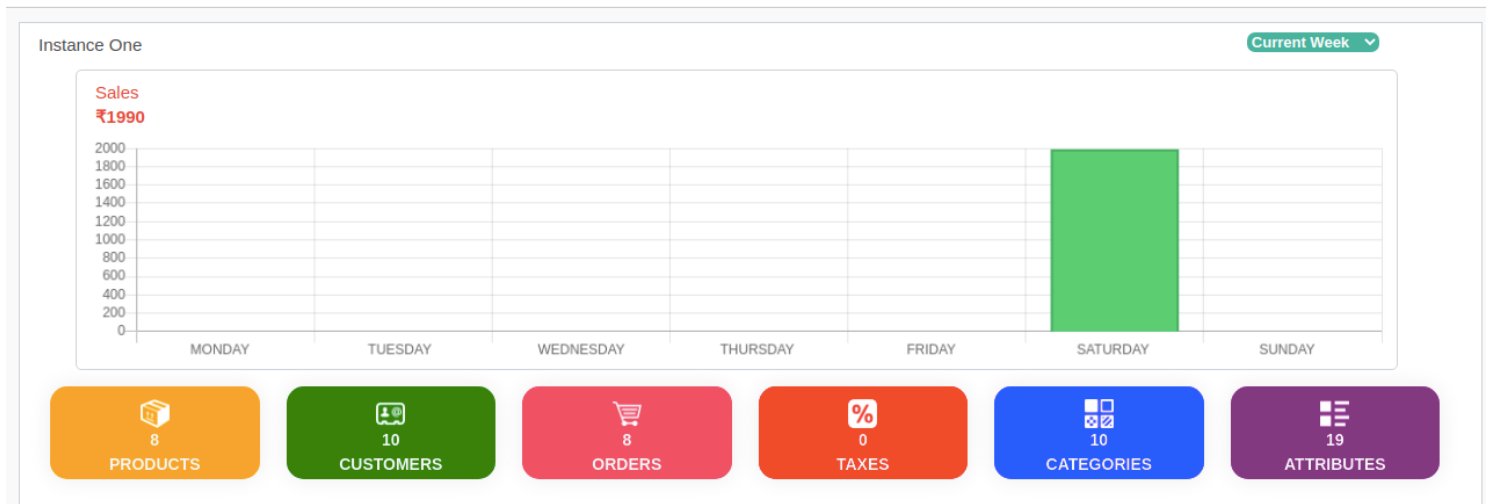

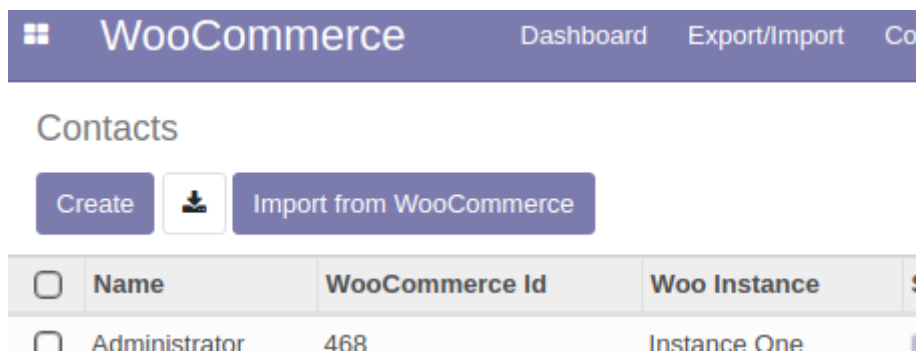

From here you can see every information about your synced instance data and total sales done with a bargraph.

EXPORT AND IMPORT CUSTOMERS

For export and import customers goto *Export/Import* menu and select *Customers*

IMPORT CUSTOMERS

For importing cutomers you can click on the *Import from WooCommerce* button,

 then a wizard will popup from where you can select from which instance the data should be imported and click on *Import Customers* button.
